#### FBI Foreign Terrorist Tracking Task Force (FTTTF)

## Exhibit 300: Part I: Summary Information and Justification (All Capital Assets)

#### I.A. Overview

| 1. Date of Submission:  | 12/19/2006  |
|---|---|
| 2. Agency:  | Department of Justice                             |
| 3. Bureau:  | Federal Bureau of Investigation                   |
| 4. Name of this Capital Asset:  | FBI Foreign Terrorist Tracking Task Force (FTTTF) |
| 5. Unique Project (Investment) Identifier: (For IT investment only, see section 53. For all other, use agency ID system.)   | 011-10-01-02-01-2808-00                           |
| 6. What kind of investment will this be in FY2008? (Please NOTE: Investments moving to O&M ONLY in FY2008, with Planning/Acquisition activities prior to FY2008 should not select O&M. These investments should indicate their current status.) | Mixed Life Cycle                                  |
| 7. What was the first budget year this investment was submitted to OMB?   | FY2002  |

# 8. Provide a brief summary and justification for this investment, including a brief description of how this closes in part or in whole an identified agency performance gap:

In 2001, Homeland Security Presidential Directive-2 established the Foreign Terrorist Tracking Task Force (FTTTF) to provide actionable intelligence to law enforcement to assist in the location and detention and ultimate removal of terrorists and their supporters from the US. In 2005, White House Memorandum Strengthening the Ability of the Department of Justice to Meet Challenges of the Security of the Nation directed the Attorney General to establish a "National Security Service" and to combine the missions, capabilities, and resources of the counterterrorism, counterintelligence, and intelligence elements of the FBI under the leadership of a senior FBI official. As a result, the FBI subsequently created the National Security Branch. This Branch will enable FBI to meet information sharing Presidential Guidelines and Initiatives such as the Intelligence Reform and Terrorism Prevention Act of 2004. In FY06, an FBI assessment determined that existing HPSD-2 national security and counterterrorism operations would be enhanced by providing analysis and technology support across the NSB by capitalizing on FTTTF's existing operations in line with FBI's Enterprise Architecture. This will enable multiple Divisions to consolidate technological and analytical resources to support the combined activities of the counterterrorism, counterintelligence, and intelligence elements of the FBI. As part of this mission, the NSB must deliver new analytical capabilities and operational products (activity reports, records, information), real-time to State, local law enforcement, Tribal, JTTTF's, NCTC, and other agencies. This data warehousing for search and retrieval capability will leverage best information and querying practices for information sharing through FBI's architecture and electronic directory services across domains. These technological solutions will increase our efficiency in sharing information with State, local and Tribal law enforcement and make it easier for us to access and analyze the information. This solution su

NSB's Analytical Capabilities Program. This IT enhancement will support the core strategy of the NSB.

| 9. Did the Agency's Executive/Investment Committee approve this request?  | Yes  |
|---|--|
| a. If "yes," what was the date of this approval?  | 5/19/2006  |
| 10. Did the Project Manager review this Exhibit?  | Yes  |
| 11. Contact information of Project Manager?   |  |
| Name  |  |
| Grigg, G Clayton  |  |
| Phone Number  | 703-553-7990   |
| Email   | GCGrigg@fbinet.fbi   |
| 12. Has the agency developed and/or promoted cost effective, energy efficient and environmentally sustainable techniques or practices for this project. | No   |
| a. Will this investment include electronic assets (including computers)?  | Yes  |
| b. Is this investment for new construction or major retrofit of a Federal building or facility? (answer applicable to non-IT assets only)               | No   |
| 1. If "yes," is an ESPC or UESC being used to help fund this investment?  | No   |
| 2. If "yes," will this investment meet sustainable design principles?   | No   |
| 3. If "yes," is it designed to be 30% more energy efficient than relevant code?   |  |
| 13. Does this investment support one of the PMA initiatives?  | Yes  |
| If "yes," check all that apply:   | Human Capital, Expanded E-Government   |
| 13a. Briefly describe how this asset directly supports the identified initiative(s)?  | Human Capital - FTTTF has only three mgmt levels - Most staff are contractors - Knowledge/skills shared across agencies - Gov't knowledge retained Expanded Electronic Gov't FTTTF: - Is conduit for electronic info to/from NJTTF/JTTFs - Cleans data & returns to DHS/ICE - Collaborates w/ foreign law enforcement - Shares information with Federal agencies - Automates laborintensive tasks - Shares innovative technologies with CIFA, NCTC, foreign partners - Helps FBI comply with FOIA. |

| 14. Does this investment support a program assessed using the Program Assessment Rating Tool (PART)? (For more information about the PART, visit www.whitehouse.gov/omb/part.) | No   |
|--|--|
| a. If "yes," does this investment address a weakness found during the PART review?   | No   |
| b. If "yes," what is the name of the PART program assessed by OMB's Program Assessment Rating Tool?  |  |
| c. If "yes," what PART rating did it receive?  |  |
| 15. Is this investment for information technology?   | Yes  |
| If the answer to Question: "Is this investment for information t answer is "No," do not answer this sub-section.   | echnology?" was "Yes," complete this sub-section. If the                         |
| For information technology investments only:   |  |
| 16. What is the level of the IT Project? (per CIO Council PM Guidance)   | Level 2  |
| 17. What project management qualifications does the Project Manager have? (per CIO Council PM Guidance):   | (4) Project manager assigned but qualification status review has not yet started |
| 18. Is this investment identified as "high risk" on the Q4 - FY 2006 agency high risk report (per OMB's "high risk" memo)?   | No   |
| 19. Is this a financial management system?   | No   |
| a. If "yes," does this investment address a FFMIA compliance area?   | No   |
| 1. If "yes," which compliance area:  |  |
| 2. If "no," what does it address?  |  |
| b. If "yes," please identify the system name(s) and system actinventory update required by Circular A-11 section 52  | ronym(s) as reported in the most recent financial systems                        |
|  |  |
| 20. What is the percentage breakout for the total FY2008 funding   | ng request for the following? (This should total 100%)                           |
| Hardware   | 16   |
| Software   | 14   |
| Services   | 70   |

Other 0

21. If this project produces information dissemination products for the public, are these products published to the Internet in conformance with OMB Memorandum 05-04 and included in your agency inventory, schedules and priorities?

N/A

22. Contact information of individual responsible for privacy related questions:

Name

Kelley, Patrick W

**Phone Number** 202-324-8067

| Title   | Deputy General Counsel/Senior Privacy Official |
|---|--|
| E-mail  | Patrick.Kelley@ic.fbi.gov                      |
| 23. Are the records produced by this investment appropriately scheduled with the National Archives and Records Administration's approval? | No   |

#### I.B. Summary of Funding

Provide the total estimated life-cycle cost for this investment by completing the following table. All amounts represent budget authority in millions, and are rounded to three decimal places. Federal personnel costs should be included only in the row designated "Government FTE Cost," and should be excluded from the amounts shown for "Planning," "Full Acquisition," and "Operation/Maintenance." The total estimated annual cost of the investment is the sum of costs for "Planning," "Full Acquisition," and "Operation/Maintenance." For Federal buildings and facilities, life-cycle costs should include long term energy, environmental, decommissioning, and/or restoration costs. The costs associated with the entire life-cycle of the investment should be included in this report.

| Table 1: SUMMARY OF SPENDING FOR PROJECT PHASES<br>(REPORTED IN MILLIONS)<br>(Estimates for BY+1 and beyond are for planning purposes only and do not represent budget decisions) |                          |         |         |         |             |             |             |                         |       |

|        |                              |  |        |  |  |  |   |
| 1.587  | 0.414                        | 0.83   | 0.83   |  |  |  |   |
| 3      | 5                            | 5  | 5      |  |  |  |   |
|        | 51.828<br> 30.218<br> 82.046 | 51.828  9.85<br> 30.218  9.85<br> 82.046  19.7 |        |  |  |  | 51.828      9.85      9.85      10.384        30.218      9.85      9.85      11.48        82.046      19.7      19.7      21.864 |

Note: For the cross-agency investments, this table should include all funding (both managing partner and partner agencies). Government FTE Costs should not be included as part of the TOTAL represented.

- 2. Will this project require the agency to hire additional FTE's? Yes
  - a. If "yes," How many and in what year?

2 in 2006

3. If the summary of spending has changed from the FY2007 President's budget request, briefly explain those changes:

On June 28, 2005, the President issued White House Memorandum: Strengthening the ability of the Department of Justice to Meet Challenges of the Security of the Nation which directed the Attorney General to establish a "National Security Service" and combine the missions, capabilities, and resources of counterterrorism, counterintelligence, and intelligence elements of the FBI. The FBI subsequently created the National Security Branch (NSB). The NSB mission is to optimally position the FBI to protect the US against WMD, terrorist attacks, foreign intelligence operations, and espionage. In order to meet the NSB mission, the NSB must deliver new analytical capabilities and technical products, which will provide real-time, unclassified, terrorism threat information to State, local and Tribal law enforcement agencies; and a data warehousing and extraction capability that will leverage best information consolidation and querying practices and yield greater analytical efficiencies. To do this expeditiously and efficiently, the NSB determined that the existing operations of FTTTF would be enhanced and expanded to support all of the NSB with the creation of the National Security Analysis Center (NSAC). Existing HSPD-2 operations of the FTTTF would continue intact, and be expanded and enhanced to perform the additional duties required in supporting all Divisions of the NSB. The impact on FTTTF will be substantial and require additional infrastructure, space, personnel, and the establishment of new business processes to comply with existing privacy laws regarding US Persons and the protection of sensitive information. Additionally, the expansion of duties will cause substantial impact on the daily operations of the FTTTF as the addition of new facilities, personnel, infrastructure and operations are integrated with existing procedures and the ongoing operations of the FTTTF.

#### I.C. Acquisition/Contract Strategy

1. Complete the table for all (including all non-Federal) contracts and/or task orders currently in place or planned for this investment. Total Value should include all option years for each contract. Contracts and/or task orders completed do not need to be included.

#### Contracts/Task Orders Table:

#### Contracts/Task Orders Table

# 2. If earned value is not required or will not be a contract requirement for any of the contracts or task orders above, explain why:

Earned value was not included as a contract requirement for previously initiated contracts. FTTTF contracts are currently tracked at the project level using the Work Break-Down Structure (WBS). Future contracts awards will include EVM performance measures and goals.

| 3. Do the contracts ensure Section 508 compliance?  | Yes      |
|---|----------|
| a. Explain why:   |          |
| 4. Is there an acquisition plan which has been approved in accordance with agency requirements? | Yes      |
| a. If "yes," what is the date?  | 6/1/2004 |
| b. If "no," will an acquisition plan be developed?  |          |

1. If "no," briefly explain why:

#### I.D. Performance Information

In order to successfully address this area of the exhibit 300, performance goals must be provided for the agency and be linked to the annual performance plan. The investment must discuss the agency's mission and strategic goals, and performance measures must be provided. These goals need to map to the gap in the agency's strategic goals and objectives this investment is designed to fill. They are the internal and external performance benefits this investment is expected to deliver to the agency (e.g., improve efficiency by 60 percent, increase citizen participation by 300 percent a year to achieve an overall citizen participation rate of 75 percent by FY 2xxx, etc.). The goals must be clearly measurable investment outcomes, and if applicable, investment outputs. They do not include the completion date of the module, milestones, or investment, or general goals, such as, significant, better, improved that do not have a quantitative or qualitative measure.

Agencies must use Table 1 below for reporting performance goals and measures for all non-IT investments and for existing IT investments that were initiated prior to FY 2005. The table can be extended to include measures for years beyond FY 2006.

| Performance Information Table 1: |                   |                     |                       |                     |                    |
|----------------------------------|-------------------|---------------------|-----------------------|---------------------|--------------------|
| Fiscal                           | Strategic Goal(s) | Performance Measure | Actual/baseline (from | Planned Performance | Performance Metric |

| Year | Supported   |  | Previous Year)  | Metric (Target)  | Results (Actual)  |
|------|---|--|---|--|---|
| 2004 | STRATEGIC OBJECTIVE II.<br>B.1 Prevent terrorist attacks<br>against the United States<br>and its interests. | Number of risk assessment models developed. (FY 2003: 0)   | 0 risk models developed in 2003.  | 1 Risk Model developed.  | 1 Flight Training Risk Model Developed.   |
| 2004 | STRATEGIC OBJECTIVE II.<br>B.1 Prevent terrorist attacks<br>against the United States<br>and its interests. | Number of analyses<br>conducted on Foreign<br>Hazmat drivers operating in<br>the US. (FY03: 0)   | 0 names analyzed in 2003  | Fulfill 100% of requests within 7 working days.  | 15 new analytical products were started.  |
| 2004 | STRATEGIC OBJECTIVE II.<br>B.1 Prevent terrorist attacks<br>against the United States<br>and its interests  | Number of applicants for flight training, covered by ATSA Section 113, who are reviewed for risk to aviation and national security. (FY 2001: 0) | 0 Applicants in 2001  | Handle all within the legislated time constraints ¿ approximately 600 per year               | Since 12/2004, subjects investigated at an annual rate of 602/yr.   |
| 2004 | B.1 Prevent terrorist attacks against the United States   | Number of requests for actionable information on suspected associates of terrorism. (FY2001: 0).   | 0 requests in 2001  | Handle all predicated<br>requests. FY 2002 through<br>2008 ¿ approximately 5000<br>per year. | 1092 leads created and additional information provided on 12,802 individuals.   |
| 2005 | STRATEGIC OBJECTIVE II.<br>B.1 Prevent terrorist attacks<br>against the United States<br>and its interests  | (1) Amount of data accumulated (FY 2001: 0).   | 0 data records in 2001.   | Accumulate up to 500 million records by end of FY 2005.                                      | More than 40 datasets have been gathered from at least nine different agencies Approximately 1 billion records accumulated (FY 2005). |
| 2005 | STRATEGIC OBJECTIVE II.<br>B.1 Prevent terrorist attacks<br>against the United States<br>and its interests. | collaborated with to develop risk models ¿ (FY03: 1).  | Five different agencies collaborated to develop risk methodology and prototype model. No new agencies in FY 2005. | Increase agency participation by 4.  | Five different agencies collaborated to develop risk models. (2004)   |
| 2005 | STRATEGIC OBJECTIVE II.<br>B.1 Prevent terrorist attacks<br>against the United States<br>and its interests. | Analyze data for aliens from countries of interest.  | 0 countries analyzed in 2004  | Fully analyze data for aliens from one country of interest in 2005.                          | One of seven countries of interest analyzed, products developed and leads sent to field (2005). Second country analysis has begun.    |
| 2005 | STRATEGIC OBJECTIVE II.<br>B.1 Prevent terrorist attacks<br>against the United States<br>and its interests. | SEVIS and ADIS data being received from DHS - none in 2004.  | No data received in 2004  | Ingest 18 million ADIS and 100 million SEVIS records   | Pilot conducted with 66,000<br>records. (2005) 18.8 million<br>ADIS and 4.95 million SEVIS<br>records ingested (2005)                 |

|      |  |   |   |   | Manual update process established (2006)   |
|------|--|---|---|---|--|
| 2005 | STRATEGIC OBJECTIVE IV.B.1.Ensure all current and future information technology plans work towards a harmonized system.  | Preliminary Enterprise<br>Architecture (EA). (2004)                             | As-is enterprise architecture in process. (2005)  | Hold IPT sessions to obtain<br>inputs for FTTTF to-be EA.<br>(2005) Develop as-is EA.<br>(2005) | As-Is business Reference<br>Model, Component Reference<br>Model, Application Reference<br>Model, and Technology<br>Reference Models developed.<br>IPT workshops for to-be EA<br>scheduled. |
| 2005 | STRATEGIC OBJECTIVE IV.B.2. Make all technology available to employees wherever they work or travel. STRATEGIC OBJECTIVE IV.C.2. Improve the delivery of existing tools, technologies, and services and develop and deliver new technologies, tools, and services. | Tools developed and used<br>within FTTTF support only<br>FTTTF analysts. (2004) | DEEP project piloted in<br>March 2005 allows agents to<br>manage and search terrorist<br>cases.                                   | Develop pilot programs to extend terrorist tracking tools to field offices.                     | DEEP project fielded to all<br>field offices. (2005) Guardian<br>1.4 system re-hosted at<br>FTTTF (2005)   |
| 2005 | STRATEGIC OBJECTIVE IV.B.4. Provide tools to increase the speed and efficiency of data use.  | No ability to perform entity resolution across different data sets. (2004)      | Conducted preliminary test<br>with DHS data. (2005)   | Develop rules for resolving data for 3 data sets. (2005)  | Preliminary rules established for 5 databases. (2005)  |
| 2006 | STRATEGIC OBJECTIVE II.<br>B.1 Prevent terrorist attacks<br>against the United States<br>and its interests   | (1) Amount of data<br>accumulated<br>(FY 2001: 0).                              | More than 40 datasets have<br>been gathered from at least<br>nine different agencies,<br>comprising 1 billion records.            | Accumulate an additional 1.5 billion records in FY 2006.  | Approximately 1.3 billion records accumulated (FY 2006, 2 Qtr).  |
| 2006 | STRATEGIC OBJECTIVE II.<br>B.1 Prevent terrorist attacks<br>against the United States<br>and its interests   | Guardian  | Guardian 1.4 moved to<br>FTTTF (FY05) Guardian 2.0<br>under development.  | Delivery of Guardian 2.0<br>(FY06)  |  |
| 2006 | STRATEGIC OBJECTIVE II.<br>B.1 Prevent terrorist attacks<br>against the United States<br>and its interests   | DEEP  | DEEP 1.2 under development.   | Delivery of DEEP 1.2 (FY06)   |  |
| 2006 | STRATEGIC OBJECTIVE II.<br>B.1 Prevent terrorist attacks<br>against the United States<br>and its interests   | Number of risk assessment<br>models developed. (FY 2003:<br>0)                  | Core methodology developed<br>and demonstrated in<br>prototype model. |      |  |  | address broader terrorist applications designed and planned for initial operation in FY 2006.  |  |  |
|------|--|--|--|--|--|
| 2006 | STRATEGIC OBJECTIVE IV.B.2. Make all technology available to employees wherever they work or travel. STRATEGIC OBJECTIVE IV.C.2. Improve the delivery of existing tools, technologies, and services and develop and deliver new technologies, tools, and services. | Tools developed and used<br>within FTTTF support only<br>FTTTF analysts. (2004)  | QTIP search tool allows agents and analysts to perform query multiple data sources in batches. NEXT project piloted in Fall of FY2005 extends FTTTF tools across FBI (S) network. Guardian database allows agents and analysts to store and process threat | Develop pilot programs to extend terrorist tracking tools to field offices. Evolve FTTTF analytic capabilities to all NSAC users Guardian 2.0 developed by FTTTF to be deployed to all field offices. (2006) |  |
| 2006 | STRATEGIC OBJECTIVE III.B.1. RAINING AND DEVELOPEMENT develop a system that dramatically expands the total training and career development of the FBI's professional workforce.  | No organized training program in existence for FTTTF analysts. (2003) Analysts are trained on analytic tools as needed. Training tracked via Excel spreadsheet. (2005) | 60% of analysts trained in all analytic tools. Training Course designed. Will be completed in the 3rd Qtr 05 and implemented in 3rd and 4th Qtr 05 for 100% qualification of all analysts. Database design begun.  | 100% of analysts fully trained. (2006) Complete training course, FY 05. Implement in FY 2006. Continue training development updates (2007, 2008) Database operational by start of FY 2006.                   |  |
| 2006 | STRATEGIC OBJECTIVE IV.B.4. Provide tools to increase the speed and efficiency of data use.  | No ability to perform entity resolution across different data sets. (2004)   | Conducted preliminary test with DHS data. (2005)   | Enhance the entity resolution capabilities (2008)  |  |
| 2007 | STRATEGIC OBJECTIVE II.<br>B.1 Prevent terrorist attacks<br>against the United States<br>and its interests   | (1) Amount of data accumulated (FY 2001: 0).   | More than 40 datasets have been gathered from at least nine different agencies, comprising 1 billion records.  | additional 500 million records in FY 2007.   |  |
| 2007 | STRATEGIC OBJECTIVE II.<br>B.1 Prevent terrorist attacks<br>against the United States<br>and its interests   | Guardian   | Guardian 2.x and e-Guardian under development.   | Delivery of Guardian 2.x and e-Guardian (FY07)   |  |
| 2007 | STRATEGIC OBJECTIVE II.<br>B.1 Prevent terrorist attacks<br>against the United States<br>and its interests   | DEEP   | DEEP 1.2 under<br>development.   | Delivery of DEEP 1.X and/or 2.x (FY07)   |  |
| 2007 | STRATEGIC OBJECTIVE II.<br>B.1 Prevent terrorist attacks   | Number of risk assessment models developed. (FY 2003:  |  | Develop robust rules and tool enhancements for FY07/FY08   |  |

|      | against the United States and its interests  | 0)  | prototype model  |   |  |
|------|--|---|--|---|--|
| 2007 | STRATEGIC OBJECTIVE IV.B.2. Make all technology available to employees wherever they work or travel. STRATEGIC OBJECTIVE IV.C.2. Improve the delivery of existing tools, technologies, and services and develop and deliver new technologies, tools, and services. | Tools developed and used<br>within FTTTF support only<br>FTTTF analysts. (2004)   | e-Guardian database shares<br>unclassified threat and<br>suspicious incident reports<br>with state and local law<br>enforcement            | e-Guardian system to be<br>deployed to state and local<br>law enforcement (2007)  |  |
| 2007 | STRATEGIC OBJECTIVE III.B.1. RAINING AND DEVELOPEMENT develop a system that dramatically expands the total training and career development of the FBI's professional workforce.  | No VTC courses currently<br>available from FTTTF. (2005)<br>This is a new function<br>beginning in FY 2006              | State of the art VTC capable educational facility installed 2005.  | Create syllabus of available courses; Establish relationships with field sites and legats to inform of available training; establish regular offerings. |  |
| 2008 | STRATEGIC OBJECTIVE<br>IV.B.4. Provide tools to<br>increase the speed and<br>efficiency of data use.   | No ability to perform entity resolution across different data sets. (2004)  | Conducted preliminary test with DHS data. (2005)   | Begin resolving data entities upon data ingest. (2006)  |  |
| 2008 | STRATEGIC OBJECTIVE II.<br>B.1 Prevent terrorist attacks<br>against the United States<br>and its interests   | 1) Amount of data<br>accumulated<br>(FY 2001: 0).   | More than 40 datasets have been gathered from at least nine different agencies, comprising 1 billion records.                              | Accumulate an additional 1<br>billion records by FY 2008<br>Begin accumulation of data<br>to support NSAC   |  |
| 2008 | STRATEGIC OBJECTIVE II.<br>B.1 Prevent terrorist attacks<br>against the United States<br>and its interests   | Number of times known terrorist names are run against other data to determine if they have come into the US undetected. | Alerts on terrorists who may<br>be located in the US<br>undetected have resulted in<br>651 alerts for analysis, with<br>27 disseminations. | Alerts are conducted on an ongoing basis from the CTL.  |  |
| 2008 | IV.B.1.Ensure all current and<br>future information<br>technology plans work<br>towards a harmonized<br>system   |   | As-is enterprise architecture in process. (2005)   | Merge into OCIO's Enterprise<br>Architecture (2008)   |  |
| 2008 | STRATEGIC OBJECTIVE  | Tools developed and used  | QTIP search tool allows  | Enhance FTTTF data mart   |  |

|      | IV.B.2. Make all technology available to employees wherever they work or travel. STRATEGIC OBJECTIVE IV.C.2. Improve the delivery of existing tools, technologies, and services and develop and deliver new technologies, tools, and services.                     | within FTTTF support only<br>FTTTF analysts. (2004)   | agents and analysts to perform query multiple data sources in batches NEXT project piloted in Fall of FY2005 extends FTTTF tools across FBI (S) network.                         | architecture to support the integration of NSAC.                         |  |
|------|--|---|--|--|--|
| 2009 | STRATEGIC OBJECTIVE II.<br>B.1 Prevent terrorist attacks<br>against the United States<br>and its interests   | (1) Amount of data accumulated (FY 2001: 0).  | More than 40 datasets have been gathered from at least nine different agencies, comprising 1 billion records.  | Accumulate an additional 500 million records.                            |  |
| 2009 | STRATEGIC OBJECTIVE II.<br>B.1 Prevent terrorist attacks<br>against the United States<br>and its interests   | Number of times known terrorist names are run against other data to determine if they have come into the US undetected. | Alerts on terrorists who may<br>be located in the US<br>undetected have resulted in<br>651 alerts for analysis, with<br>27 disseminations.                                       | Alerts are conducted on an ongoing basis from the CTL.                   |  |
| 2009 | STRATEGIC OBJECTIVE IV.B.2. Make all technology available to employees wherever they work or travel. STRATEGIC OBJECTIVE IV.C.2. Improve the delivery of existing tools, technologies, and services and develop and deliver new technologies, tools, and services. | Tools developed and used<br>within FTTTF support only<br>FTTTF analysts. (2004)   | QTIP search tool allows agents and analysts to perform query multiple data sources in batches NEXT project piloted in Fall of FY2005 extends FTTTF tools across FBI (S) network. | Enhance FTTTF data mart architecture to support the integration of NSAC. |  |
| 2009 | STRATEGIC OBJECTIVE IV.B.4. Provide tools to increase the speed and efficiency of data use.  | No ability to perform entity resolution across different data sets. (2004)  | Conducted preliminary test with DHS data. (2005)   | Enhance the entity resolution capabilities                               |  |
| 2010 | STRATEGIC OBJECTIVE II.<br>B.1 Prevent terrorist attacks<br>against the United States<br>and its interests   | (1) Amount of data accumulated (FY 2001: 0).  | More than 40 datasets have been gathered from at least nine different agencies, comprising 1 billion records.  | Accumulate an additional 500 million records.                            |  |

All new IT investments initiated for FY 2005 and beyond must use Table 2 and are required to use the Federal Enterprise Architecture (FEA) Performance Reference Model (PRM). Please use Table 2 and the PRM to identify the performance information pertaining to this major IT investment. Map all Measurement Indicators to the corresponding "Measurement Area" and "Measurement Grouping" identified in the PRM. There should be at least one Measurement Indicator for at least four different Measurement Areas (for each fiscal year). The PRM is available at www.egov.gov.

|                | Performance Information Table 2: |                         |                         |                          |          |                                     |                   |  |  |

### I.E. Security and Privacy

In order to successfully address this area of the business case, each question below must be answered at the system/application level, not at a program or agency level. Systems supporting this investment on the planning and operational systems security tables should match the systems on the privacy table below. Systems on the Operational Security Table must be included on your agency FISMA system inventory and should be easily referenced in the inventory (i.e., should use the same name or identifier).

All systems supporting and/or part of this investment should be included in the tables below, inclusive of both agency owned systems and contractor systems. For IT investments under development, security and privacy planning must proceed in parallel with the development of the system/s to ensure IT security and privacy requirements and costs are identified and incorporated into the overall lifecycle of the system/s.

Please respond to the questions below and verify the system owner took the following actions:

system supporting or part of this investment.

1. Have the IT security costs for the system(s) been identified and integrated into the overall costs of the investment:

a. If "yes," provide the "Percentage IT Security" for the budget year:

5.56

2. Is identifying and assessing security and privacy risks a part of the overall risk management effort for each

| 3. Systems in Planning - Security Table:   |                 |           |           |  |  |  |  |  |  |
|--|-----------------|-----------|-----------|--|--|--|--|--|--|
| Name of System Agency/ or Contractor Operated System? Planned Operational Date Planned or Actual C&A Completion Date |                 |           |           |  |  |  |  |  |  |
| FTTTF Platinum   | Government Only | 10/1/2008 | 9/30/2008 |  |  |  |  |  |  |
| FTTTF TACDCN (U)   | Government Only | 10/1/2008 | 9/30/2008 |  |  |  |  |  |  |

| -                      | 4. Operational Systems - Security Table:  |                                       |  |                      |   |  |                                  |  |  |
|------------------------|---|---------------------------------------|--|----------------------|---|--|----------------------------------|--|--|
| Name of<br>System      | Agency/ or Contractor<br>Operated System? | NIST FIPS 199<br>Risk Impact<br>level | Has C&A been<br>Completed, using NIST<br>800-37? | Date C&A<br>Complete | What standards were used for the Security Controls tests? | Date Complete(d):<br>Security Control<br>Testing | Date the contingency plan tested |  |  |
| FTTTF<br>Platinum      | Government Only                           |                                       | Yes  | 8/8/2005             | FIPS 200 / NIST 800-53                                    | 5/22/2006  | 6/20/2006                        |  |  |
| FTTTF<br>TACDCN<br>(U) | Government Only                           |                                       | Yes  | 4/24/2005            | FIPS 200 / NIST 800-53                                    | 5/22/2006  | 6/20/2006                        |  |  |

5. Have any weaknesses related to any of the systems part of or supporting this investment been identified by the agency or IG?

- a. If "yes," have those weaknesses been incorporated agency's plan of action and milestone process?
- 6. Indicate whether an increase in IT security funding is requested to remediate IT security weaknesses?
- a. If "yes," specify the amount, provide a general description of the weakness, and explain how the funding request will remediate the weakness.
- 7. How are contractor security procedures monitored, verified, validated by the agency for the contractor systems above?

  N/A

|                     | 8. Planning & Operational Systems - Privacy Table: |   |   |  |  |  |  |  |  |
|---------------------|--|---|---|--|--|--|--|--|--|
| Name of<br>System   | Is this a new system?                              | Is there a Privacy Impact<br>Assessment (PIA) that covers this<br>system? | Is the PIA<br>available to the<br>public? | Is a System of Records Notice<br>(SORN) required for this<br>system? | Was a new or amended SORN published in FY 06?  |  |  |  |  |
| FTTTF<br>Platinum   | No   | Yes.  | Yes.                                      | Yes  | No, because the existing Privacy Act system of records was not substantially revised in FY 06. |  |  |  |  |
| FTTTF<br>TACDCN (U) | No   | Yes.  | Yes.                                      | Yes  | No, because the existing Privacy Act system of records was not substantially revised in FY 06. |  |  |  |  |

#### I.F. Enterprise Architecture (EA)

In order to successfully address this area of the business case and capital asset plan you must ensure the investment is included in the agency's EA and Capital Planning and Investment Control (CPIC) process, and is mapped to and supports the FEA. You must also ensure the business case demonstrates the relationship between the investment and the business, performance, data, services, application, and technology layers of the agency's EA.

1. Is this investment included in your agency's target enterprise architecture?

Yes

- a. If "no," please explain why?
- 2. Is this investment included in the agency's EA Transition Strategy?

Yes FTTTF

a. If "yes," provide the investment name as identified in the Transition Strategy provided in the agency's most recent annual EA Assessment.

# b. If "no," please explain why?

# 3. Service Reference Model (SRM) Table:

Identify the service components funded by this major IT investment (e.g., knowledge management, content management, customer relationship management, etc.). Provide this information in the format of the following table. For detailed guidance regarding components, please refer to http://www.whitehouse.gov/omb/egov/.

| Agency<br>Component<br>Name | Agency<br>Component<br>Description | Service<br>Domain                  | FEA SRM<br>Service Type     | FEA SRM<br>Component                     | FEA Service<br>Component<br>Reused Name | FEA Service<br>Component<br>Reused UPI | Internal or<br>External<br>Reuse? | BY Funding<br>Percentage |
|-----------------------------|------------------------------------|------------------------------------|-----------------------------|--|---|--|-----------------------------------|--------------------------|
|                             |                                    | Back Office<br>Services            | Data Management             | Data Classification                      |   |  | No Reuse                          | 0                        |
|                             |                                    | Back Office<br>Services            | Data Management             | Data Cleansing                           |   |  | No Reuse                          | 16                       |
|                             |                                    | Back Office<br>Services            | Data Management             | Data Exchange                            |   |  | No Reuse                          | 30                       |

Use existing SRM Components or identify as "NEW". A "NEW" component is one not already identified as a service component in the FEA SRM.

A reused component is one being funded by another investment, but being used by this investment. Rather than answer yes or no, identify the reused service component funded by the other investment and identify the other investment using the Unique Project Identifier (UPI) code from the OMB Ex 300 or Ex 53 submission.

'Internal' reuse is within an agency. For example, one agency within a department is reusing a service component provided by another agency within the same department. 'External' reuse is one agency within a department reusing a service component

provided by another agency in another department. A good example of this is an E-Gov initiative service being reused by multiple organizations across the federal government.

Please provide the percentage of the BY requested funding amount used for each service component listed in the table. If external, provide the funding level transferred to another agency to pay for the service.

## 4. Technical Reference Model (TRM) Table:

To demonstrate how this major IT investment aligns with the FEA Technical Reference Model (TRM), please list the Service Areas, Categories, Standards, and Service Specifications supporting this IT investment.

| FEA SRM Component    | FEA TRM Service Area | FEA TRM Service<br>Category | FEA TRM Service<br>Standard | Service Specification (i.e. vendor or product name) |
|----------------------|----------------------|-----------------------------|-----------------------------|---|
| Software Development | Component Framework  | Business Logic              | Platform Dependent          | BEA Web Services for Remote Portals (WSRP)          |
| Software Development | Component Framework  | Business Logic              | Platform Dependent          | GNU C, C++  |
| Software Development | Component Framework  | Business Logic              | Platform Dependent          | Microsoft C-Sharp (C#)                              |
| Software Development | Component Framework  | Business Logic              | Platform Dependent          | Microsoft VB Script                                 |
| Software Development | Component Framework  | Business Logic              | Platform Dependent          | Microsoft Visual Basic                              |
| Software Development | Component Framework  | Business Logic              | Platform Dependent          | Microsoft Visual Basic                              |
| Software Development | Component Framework  | Business Logic              | Platform Dependent          | Microsoft Visual Basic .Net (VB.Net)                |

Service Components identified in the previous question should be entered in this column. Please enter multiple rows for FEA SRM Components supported by multiple TRM Service Specifications

In the Service Specification field, Agencies should provide information on the specified technical standard or vendor product mapped to the FEA TRM Service Standard, including model or version numbers, as appropriate.

5. Will the application leverage existing components and/or applications across the Government (i.e., FirstGov, Pay.Gov, etc)?

No

- a. If "yes," please describe.
- 6. Does this investment provide the public with access to a government automated information system?

No

- a. If "yes," does customer access require specific software (e.g., a specific web browser version)?
- 1. If "yes," provide the specific product name(s) and version number(s) of the required software and the date when the public will be able to access this investment by any software (i.e. to ensure equitable and timely access of government information and services).

# Exhibit 300: Part II: Planning, Acquisition and Performance Information

### II.A. Alternatives Analysis

Part II should be completed only for investments identified as "Planning" or "Full Acquisition," or "Mixed Life-Cycle" investments in response to Question 6 in Part I, Section A above.

In selecting the best capital asset, you should identify and consider at least three viable alternatives, in addition to the current

baseline, i.e., the status quo. Use OMB Circular A- 94 for all investments, and the Clinger Cohen Act of 1996 for IT investments, to determine the criteria you should use in your Benefit/Cost Analysis.

1. Did you conduct an alternatives analysis for this project?

Yes

a. If "yes," provide the date the analysis was completed?

6/6/2004

- b. If "no," what is the anticipated date this analysis will be completed?
- c. If no analysis is planned, please briefly explain why:

| 2. Alternative Analysis Results:   |  |
|--|--|
| Use the results of your alternatives analysis to complete the following table: |  |

| Send<br>to<br>OMB | Alternative<br>Analyzed | Description of Alternative   | Risk Adjusted<br>Lifecycle Costs<br>estimate | Risk Adjusted<br>Lifecycle<br>Benefits<br>estimate |
|-------------------|-------------------------|--|--|--|
| True              | 2                       | Continue to develop and enhance FTTTF's entity resolution capabilities, continue to develop and enhance entity matching, and continue to develop and enhance risk assessment tools. This alternative takes full advantage of existing expertise and experience of current technologies and service support contractors already familiar with FTTTF data and systems. | 231  | 108691   |
|                   |                         |  |  |  |

## 3. Which alternative was selected by the Agency's Executive/Investment Committee and why was it chosen?

The methodology used for determining which alternative to chose was based upon internal research with respect current performance measures of operational processes for conducting entity resolution, entity linkage, and risk assessment of FTTTF data. Data was collected and analyzed with respect to automated processes vs. manual processes to complete the same amount of work. Alternative 2 provides the most flexible migration path to operate and maintain existing installed baseline architecture. It also addresses new FTTTF enhancements and supports integration of the NSB's Analytical Capabilities Program. Alternative 2 maintains current capabilities and uses technologies and service support from personnel who are already experts on FTTTF systems. This alternative also produces the highest return on investment (ROI). These are listed: ¿ Alternative 2 - Estimated Annual Budget for FY08 - \$21.8M, with an ROI of 471%. In FY08 and beyond, the National Security Analysis Center (NSAC) enhancement further expands the FTTTF capabilities in terms of data ingest, analytic support and O&M costs. The life cycle costs were calculated by a summation of the projected yearly costs of each of the alternatives from FY 2002 through FY 2012.

## 4. What specific qualitative benefits will be realized?

The FTTTF mission is to assist in the fight against terrorism by providing information to agencies which will support the removal, exclusion, and prosecution of terrorists and their supporters. Since the number of terrorist events averted by such action can never be known, no qualitative benefit can be defined on that basis. However, other measures of qualitative benefits can be enumerated. By bringing diverse data sources together, FTTTF will be able to extract data for the

creation of patterns that would never appear in any one of the data sets from their home agencies. This capability provides FTTTF with data to reduce the number of false positives and false negatives, which in turn reduces the amount of resources required to track and detect suspected terrorists. Without a centralized Data Mart capability with access to multiple data sources, FTTTF's data exploitation capabilities would be significantly reduced, or basically inoperable. The FTTTF return on investment (ROI) is based upon 3 types of analysis: the demonstrated efficiencies obtained by the analysts in vetting names and the anticipated improvements with automated risk assessment; the enhanced efficiencies expected from adding entity resolution to the Data Mart; and the time savings expected from entity matching. 1. Name vetting: Based upon empirical data, automated risk assessment will yield cost savings in labor over 395% in 2007, and over 1000% in 2008 and beyond. 2. Entity resolution: Automated entity resolution will yield an overall ROI of 3,475% over FY 06-14 (\$50.95 million in benefits over \$1.4 million in cost). 3. Entity matching: Entity matching (matching resolved entities in different datasets) will yield an overall ROI of 1,385% for FY 06-14 (\$7.73 million in benefit for \$0.56 million in cost). In addition, the overall ROI combining the 3 types of analysis does not factor in the capability FTTTF has to run the entire watch list of 509,000 names against the Data Mart on a daily basis. This function could not be performed manually due to the large amounts of data involved. Technological advances in data ingest and exploitation for the Investigative Data Warehouse (IDW) and FTTTF's Data Mart significantly reduces the number of times that data must be manually loaded into automated systems. This provides more time for investigators to perform analysis rather than routine data collection and collation.

#### II.B. Risk Management

You should have performed a risk assessment during the early planning and initial concept phase of this investment's life-cycle, developed a risk-adjusted life-cycle cost estimate and a plan to eliminate, mitigate or manage risk, and be actively managing risk throughout the investment's life-cycle.

| 1. Does the investment have a Risk Management Plan?   | Yes      |
|---|----------|
| a. If "yes," what is the date of the plan?  | 1/5/2005 |
| b. Has the Risk Management Plan been significantly changed since last year's submission to OMB? | No       |
|   |          |

- c. If "yes," describe any significant changes:
- 2. If there currently is no plan, will a plan be developed?
  - a. If "yes," what is the planned completion date?
  - b. If "no," what is the strategy for managing the risks?
- 3. Briefly describe how investment risks are reflected in the life cycle cost estimate and investment schedule:

FTTTF has calculated the risks based upon a probability and severity calculation as defined in FBI's Risk Management Guideline, dated 1/4/2005. Costs for a backup and failover site are included in the life cycle cost estimate to address reliability and technology risks. Additional personnel resources are included to support project management and oversight. The Intelligence Community (IC) INFOSEC Risk Management Methodology is the process used to identify and manage security risks associated with an Information System (IS). It comprises two key activities, Risk Assessment and Risk Management. Risk Assessment

identifies and assesses the risks associated with an IS; Risk Management identifies effective countermeasures to manage those risks.

#### II.C. Cost and Schedule Performance

| 1. Does the earned value management system meet the | Yes |
|---|-----|
| criteria in ANSI/EIA Standard-748?                  |     |

2. Answer the following questions about current cumulative cost and schedule performance. The numbers reported below should reflect current actual information. (Per OMB requirements Cost/Schedule Performance information should include both Government and Contractor Costs):

| Government and Contractor Costs).  |                 |
|--|-----------------|
| a. What is the Planned Value (PV)?   | 23883           |
| b. What is the Earned Value (EV)?  | 23883           |
| c. What is the actual cost of work performed (AC)?   | 19897           |
| d. What costs are included in the reported Cost/Schedule Performance information (Government Only/Contractor Only/Both)? | Contractor Only |
| e. "As of" date:   | 9/30/2005       |
| 3. What is the calculated Schedule Performance Index (SPI = EV/PV)?  | 1               |
| 4. What is the schedule variance (SV = EV-PV)?   | 0               |
| 5. What is the calculated Cost Performance Index (CPI = EV/AC)?  | 1.20            |
| 6. What is the cost variance (CV=EV-AC)?   | 3986            |
| 7. Is the CV% or SV% greater than +/- 10%? (CV%= CV/EV x 100; SV%= SV/PV x 100)  | Yes             |
| a. If "yes," was it the?   | CV              |
|  |                 |

## b. If "yes," explain the variance:

Cost or schedule variances do exceed negative 10 percent of planned. The positive cost variance for FY05 was driven by a FTTTF reduction in funding that was approximately 15%. In FY05, unforeseen IT requirements needed to be addressed to support two new operational systems, Guardian and DEEP. Also, reductions in FTTTF's budget contributed to technology refresh delays of workstations, which in turn caused some performance inconsistencies with operational networks. The new IT projects and reductions limited the amount of resources available for integration of technology enhancements and risk assessment.

Based on the work accomplished to date, FTTTF expects to achieve the majority of its performance goals; some goals will need to be delayed until FY06/FY07. Specifically, FTTTF will refresh workstation technology and deliver portions of "workflow" and risk assessment in FY06. A robust enterprise "workflow" system and risk assessment system will be delayed until FY07.

## c. If "yes," what corrective actions are being taken?

The project is currently within acceptable management cost and schedule variances. No corrective action is required. Cost and performance variances are largely due to a redistribution of FTTTF IT budgeted funds.

## d. What is most current "Estimate at Completion"?

| 8. Have any significant changes been made to the baseline | No |
|---|----|
| during the past fiscal year?                              |    |
| 8. If "yes," when was it approved by OMB?                 | No |

# **Comparison of Initial Baseline and Current Approved Baseline**

| Milestone | Description of Milestone                         | Initial Baseline            |            |                 | Current B  | aseline    |         | Current Bas<br>Variance | Percent<br>Complete |      |
|-----------|--|-----------------------------|------------|-----------------|------------|------------|---------|-------------------------|---------------------|------|
| Number    |  | Planned                     | Total Cost | Completion Date |            | Total Cost |         | Schedule (#             |                     | Cost |
|           |  | Completion Date (Estimated) | Planned    | Actual          | Planned    | Actual     | days)   | COST                    |                     |      |
